

# DENTAL IMPLANTS

If you are missing one or more teeth, your dentist can help you choose the best replacement option for you. At Olympia Fields Dental Associates we offer dental implants, the most advanced therapy available to replace missing teeth.

Dental implants have many benefits and advantages over traditional teeth replacement options such as bridges, crowns and dentures. They look and feel like your surrounding teeth. They can improve your smile and are the perfect alternative to natural teeth.

Implants can restore your chewing efficiency. With them, patients can enjoy all the foods they like and are not worried about their teeth in social situations. Dental implants also decrease the chances of having problems with your teeth in the future.

Dental implants are not an option for everyone. If you are considering implants, a thorough evaluation by one of our dentists will help determine if you would be a good candidate. Dental implants are changing the way people live! With them, people are rediscovering the comfort and confidence to eat, speak, laugh and enjoy life.

Implant placement can be done at Olympia Fields Dental Associates. Our calm and inviting office provides you with all of the comforts of home, and our friendly and professional staff help make your dental experience positive and stress-free. Call our office today and set up a consultation with one of our dentists or our board-certified periodontist.
